Re: SAS and ESC Applications for the 3.5 GHz Band (GN Docket No. 15-319)

Dear Ms. Dortch:

On March 6, 2018, I met with Paul Powell of the Wireless Telecommunications Bureau regarding the requirements for certification of Spectrum Access Systems (SASs) under Part 96 of the Commission's rules. I emphasized that the obligations of SAS operators must be limited to implementing requirements for spectrum use that are derived from the Commission's rules, and in no circumstance should SAS operators be expected to implement requirements for admission to the CBRS band that are inconsistent with specific provisions of Part 96 or other Commission rules that apply to CBRS.

This notice is being filed in the above-referenced docket for inclusion in the public record. Please contact me should you have any questions.

Respectfully submitted,

Austin C. Schlick
